

H100

Wessex Scale Co

overhead track scale

makes light work of carcass weighing

Avery Berkel

makes light work of carcass weighing

The *H100* digital overhead track scale from Avery Berkel helps to improve the efficiency and cost-effectiveness of any abattoir or meat processing operation.

Designed to fit quickly and easily into all types of overhead track systems, the *H100* not only increases throughput, but also helps to reduce wastage and provide greater information and control of your business.

◆ **Fast installation**

The *H100* can be installed quickly and cost-effectively by Avery Berkel's own expert service organisation, with minimal disruption to your production process.

◆ **Suits all track systems**

The compact and lightweight *H100* caters for all types of overhead track system. A full range of standard weigh rail sizes up to 1200 mm are available, to ensure that your new weighing system is delivered and installed as quickly as possible.

◆ **Hygienic and hoseproof**

All components of the *H100* are manufactured in food industry standard stainless steel or fully galvanised mild steel to ensure durability. For maximum hygiene, the scale is completely hoseproof to IP67, enabling the use of a hose for thorough cleaning.

◆ **Wide choice of indicators**

A wide variety of compatible digital indicators are available for use with the *H100*, all of which are sealed and hoseproof to IP67. They range from basic weight displays, to alpha-numeric indicators which offer full totalising facilities against product and customer codes.

◆ **High capacity**

The *H100* is capable of handling all sizes of carcass up to 600 kg.

Reap the benefits

Installing a Avery Berkel *H100* overhead track scale in your abattoir or meat processing plant, brings a wide range of benefits to your business, including:

◆ **A significant increase in throughput**

The *H100* enables carcasses to be weighed quickly and precisely, thereby increasing throughput and efficiency.

◆ **Less wastage**

With its advanced digital indication system, the *H100* ensures total weighing accuracy, enabling you to reduce wastage and keep tighter control of your profits.

◆ **Increased management information and control**

The *H100* can be linked to a wide range of peripheral equipment, such as printers and computers, to enable you to monitor your business more effectively.

◆ **Lower maintenance costs**

The *H100* can be serviced quickly and easily, allowing maintenance costs and downtime to be kept to a minimum.

◆ **Complies with all Weights & Measures legislation**

Unlike certain weighing systems which rely on mechanical indication, the *H100* features advanced digital instrumentation which complies with all Weights & Measures authority requirements.
