- ◆ Flexible promotions - including vouchers, customer messages, information labels and more

Give a commanding performance

... with  Technology

Give a commanding performance

Get M²ore from your counter service

Avery Berkel's M series retail scales feature **M² Technology** to help you conduct your business more effectively and profitably. Specific features designed to enhance your store's performance are combined with easier to manage scale networks, proactive downtime prevention and even lower ownership costs.

M202 – retail scale with double-sided tower display

With its double-sided tower display, the **M202** model is the ideal solution for applications requiring an excellent customer interface plus label and receipt printing capability. The 92 pre-set keys also enable the scale to be configured to your business needs for fast and efficient operation.

- ◆ **Unrivalled print speed**
With a market-leading print speed of up to 150 mm per second, the **M202** helps to reduce queues and enhance customer service.
- ◆ **Quick-loading paper**
The cassette printer accommodates paper rolls up to 120 mm in size and can be removed and reloaded in seconds.

Easy-access, quick-change label cassette

- ◆ **Double-sided tower displays**
Back-to-back column mounted displays help operators to maintain eye contact for enhanced customer service. With full dot matrix graphics, the scale is easy to use and offers the perfect medium to communicate messages and promotions.

- ◆ **Powerful memory**
The **M202** has ample data storage capability for even the largest retail operation – including memory for approximately 3,000 PLUs as standard with an option for expansion for up to 10,000 PLUs.
- ◆ **Any traceability system**
The **M202** is ready to operate with any legislative traceability system - for any type of product - anywhere in the world.
- ◆ **Voucher printing**
Maximise sales opportunities by printing vouchers and promotional offers alongside your labels and receipts.

Promotional offers clearly displayed

- ◆ **Asset management**
Each scale can report on its location and status – saving the time and cost of a site inspection where maintenance or system upgrades are required.
- ◆ **E-mail alerts**
Save time and money by preventing problems before they happen – the scale can be programmed to alert store or system managers to issues such as printer running out of paper, faulty print-heads and scale network problems.
